For full pricing list, click the [GET STARTED / SUBMIT YOUR TRACKS](#) button, or send an email directly to mixmastering@youngpulsemusic.com explaining your project. We will give you an accurate and detailed price very shortly.

MIXING AND MASTERING TIPS : HOW SHOULD I PREPARE MY MATERIAL ?

Mastering:

- **Stereo mastering:** just send a stereo audio file at the best quality available (WAV or AIF). Please NO LIMITING on the mix bus ! Don't hit 0dB too hard, leave 3 to 6 dBs of headroom for YP to do his thing.
- **Stems mastering:** same as stereo. Also please do not normalize the stems, in order to keep the same balance from your final mix.

Mixing: please export the multiple tracks from your DAW. We prefer if you turn EQ, compression, delays and reverbs off. You can leave other effects that have a musical value (e.g. flanger, chorus etc.). Please make sure that the individual tracks and folder are correctly named, and include your original demo mix, along with other reference tracks and your mix notes. Ideally you would name the folder 'ArtistName_SongName_BPM', then zip it (e.g. JeanDeGreen_SweetMoments_109BPM.zip).

Partners (labels & artists):
